Your **Peels Aftercare Pack** has everything you need following your in-clinic peel and will carry you through your treatment plan. Following a peel treatment, skin can be a little more fragile, so a low intensity approach is recommended. By incorporating appropriate homecare the skin will respond to its maximum potential after treatment and results will be stabilised more quickly.

Your therapist will customise an After Care Pack specially for you based upon the type of peel performed and the product prescription most suited to your skin.
